How to check contrasts?

<https://app.contrast-finder.org/>

Old contrast

Foreground		Background		Sample	Ratio	Distance
hsl(120, 32%, 40%) rgb(70, 136, 71) #468847		hsl(102, 44%, 89%) rgb(223, 240, 216) #DFF0D8		Title big size with words in bold Here is some text sample with some words in bold to illustrate the contrast.	3.61029	

New contrast : 22 results (1,786,080 colors tested)

◆ Foreground	◆	◆ Background	◆	◆ Sample	◆ Ratio	◆ Distance
hsl(123, 28%, 36%) rgb(66, 118, 69) #427645		hsl(102, 44%, 89%) rgb(223, 240, 216) #DFF0D8		Title big size with words in bold Here is some text sample with some words in bold to illustrate the contrast.	4.50074	18.07
hsl(117, 32%, 35%) rgb(62, 119, 60) #3E773C		hsl(102, 44%, 89%) rgb(223, 240, 216) #DFF0D8		Title big size with words in bold Here is some text sample with some words in bold to illustrate the contrast.	4.50092	18.9

Ensure sufficient contrast between texts and backgrounds

Normal size texts

- Less than 24px (or 18,5px if bold)

Minimum contrast ratio: 4.5:1

Big texts

- More than 24px (or 18,5px if bold)

Minimum contrast ratio: 3:1

PUBLICATIONS ET OUTILS

Plus de 2000 ressources produites par l'INRS sont mises à votre disposition (dossiers, affiches, brochures, vidéos, logiciels, revues...).

MON COMPTE

OUVRIR UN COMPTE

Ensure sufficient contrast between texts and backgrounds

How to test contrasts when using a background-image?

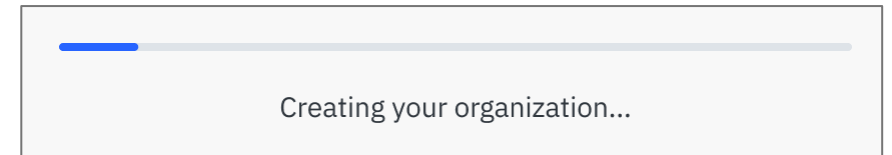

Ensure sufficient contrast between informative graphical elements and their background

- Informative icons
- Buttons or link with icon as sole content (without any text)
- Form fields
- Interface elements (tabs, etc.)

Minimum contrast ratio: 3:1

First Name	Last Name
------------	-----------

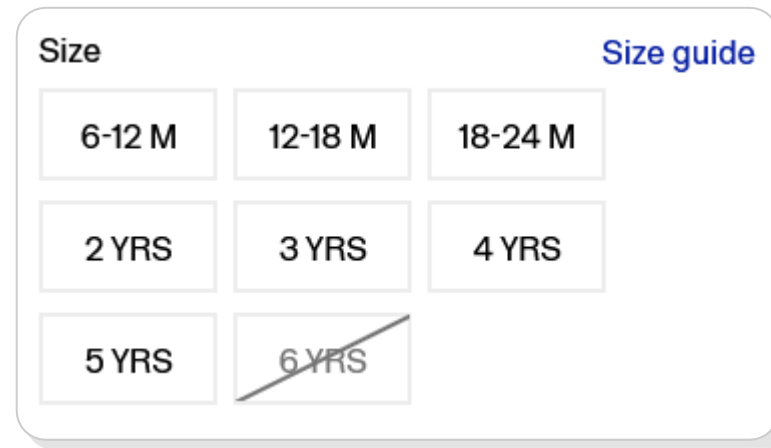

What types of content are concerned?

- **Websites and web apps**
- **Documents** (PDF, Word, Excel...)
- **E-mails**
- **Inlayed texts in images** (visuals, graphics, social media posts, etc.)
- **Inlayed texts in videos** (on-screen informations, subtitles, etc.)

Exceptions

- Logos
- Disabled interface elements
- Decorative graphical elements

J'ai besoin d'aide

At?

Look for a cinema

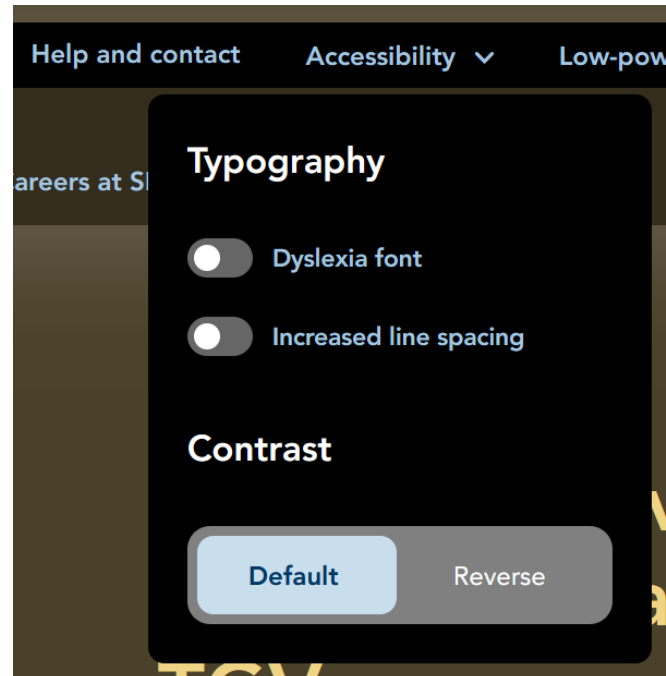

📍 Nearby

❤️ My cinemas

Provide an alternative design

- Provide a contrasts enhancement mechanism
- If so, the contrasts enhancement activation mechanism must also be sufficiently contrasted

Examples

Can you spot any accessibility problems regarding colours on the following websites?

- <https://www.levi.com/FR/en/>
- <https://www.visit.alsace/en/>
- <https://www.martell.com/en-us/>

Do not use colour alone to convey information

- Diagram with a legend on the side
- Active item in a menu
- Active slide in a slideshow
- Etc.

LANGUE : FR / EN / JA

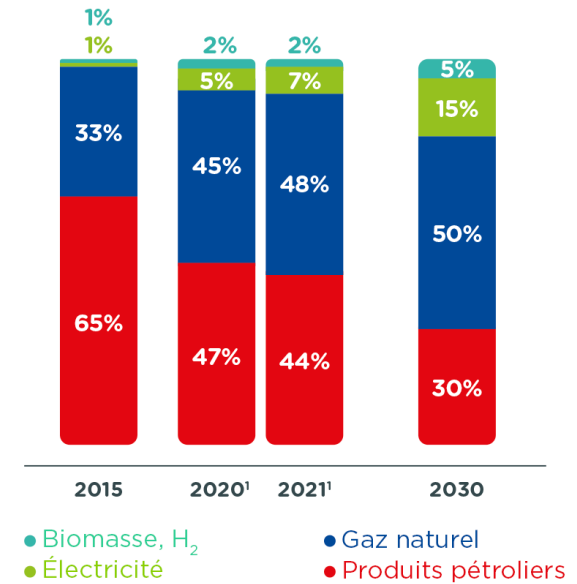

Clients

Brands

Campaigns

Projects

Mix de ventes

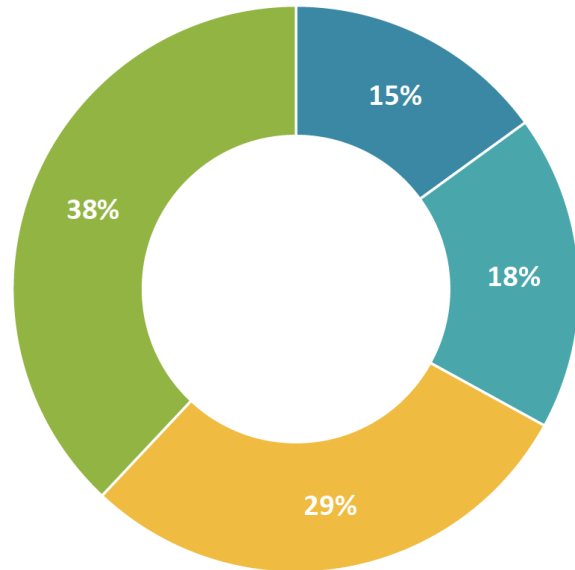

1. Hors effet Covid-19. Total arrondi.

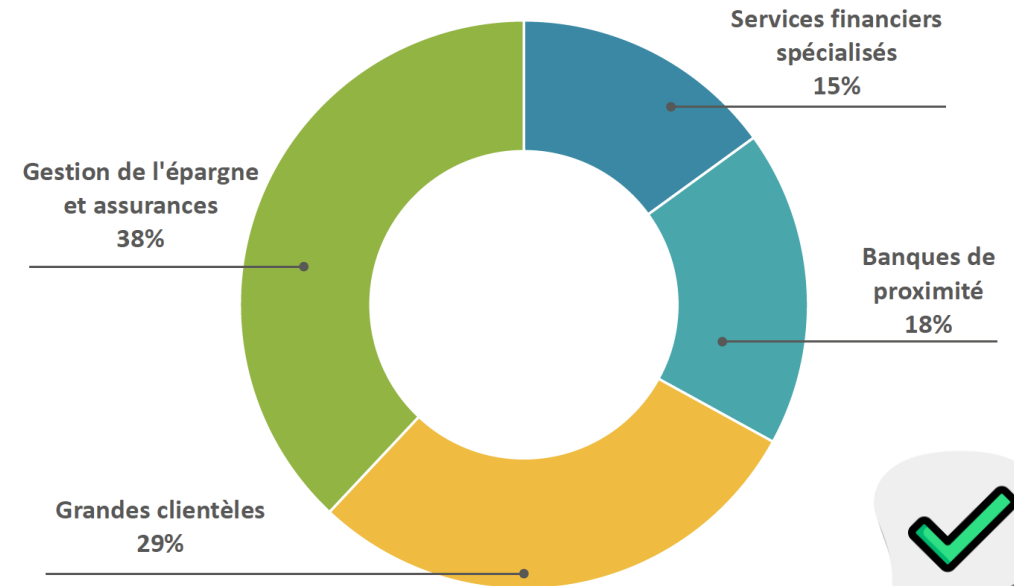

Do not use colour alone to convey information

Répartition du résultat net part du Groupe
par pôle métier

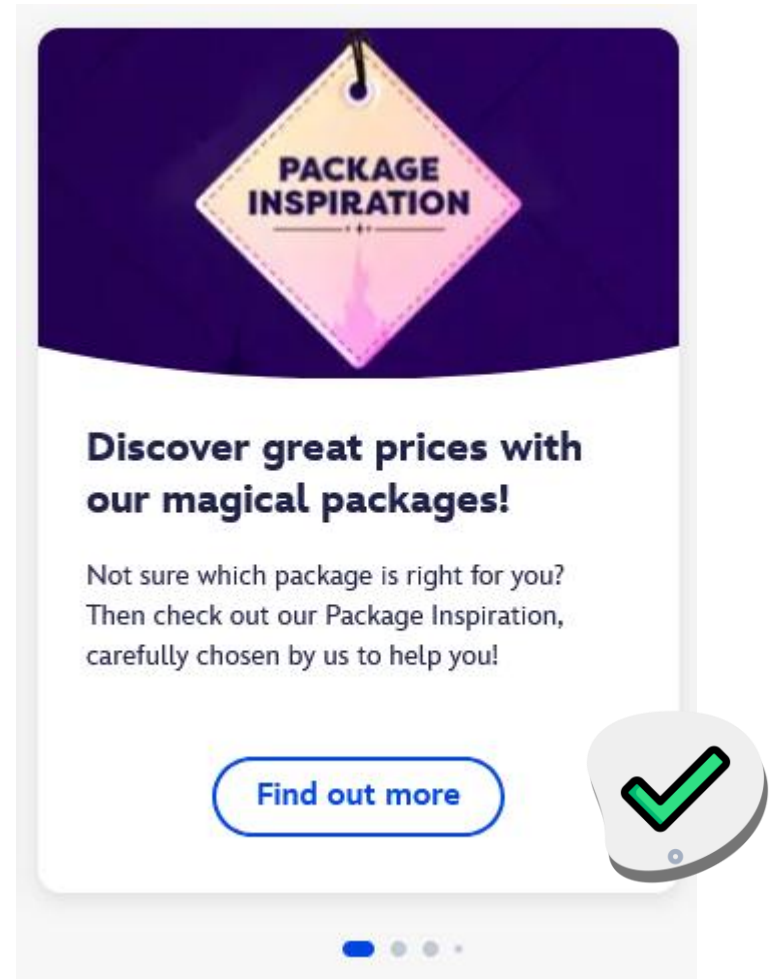

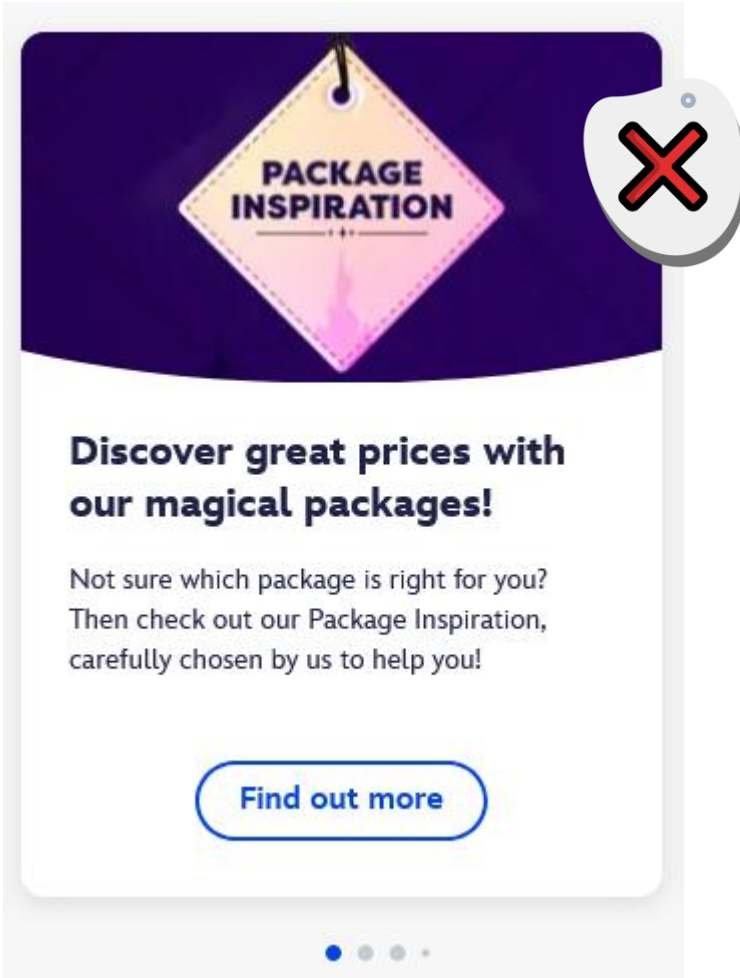

■ Services financiers spécialisés ■ Banques de proximité
■ Grandes clientèles ■ Gestion de l'épargne et assurances

Répartition du résultat net part du Groupe
par pôle métier

Do not use colour alone to convey information

Links

Write self-explanatory link headings

As far as possible, provide clear and explicit headings that can be understood even if the heading is read independently of the surrounding text.

To unsubscribe from the newsletter, click here.

You can unsubscribe from the newsletter.

For a link to be explicit, its heading must make it possible to identify the **purpose** of the link, its **function** and its **destination**.

Visually differentiate links in text blocks

When a link is present in a block of text, underline it (or use any other graphical differentiation, in addition to colour).

Avant d'utiliser nos Médias Numériques, merci de bien vouloir lire attentivement cette Politique en Matière de Cookies (y compris la **Politique de Confidentialité en ligne** de P). Si vous êtes en désaccord avec cette Politique en Matière de Cookies ou avec la **Politique de Confidentialité en ligne** de Martell, veuillez ne pas utiliser nos Médias Numériques.

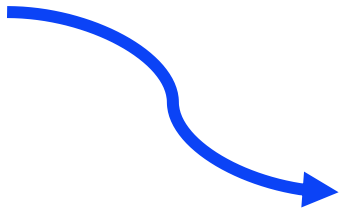

Visually differentiate links in text blocks

Otherwise, if using colour only as the only distinction :

- Minimum contrast ratio between the link and its surrounding text must at least be **3:1**.
- The focus/hover indicator must not only be a change of colour.

- L'apprenti est reconnu **travailleur handicapé**
- L'apprenti envisage de créer ou reprendre une entreprise supposant l'obtention d'un diplôme [exemple : dispositif d'aide individualisée **Acre**, **Nacre** ou **Cape**]

Cette **école de commerce valorise l'alternance**. Les parcours proposés allient cours théoriques et **immersion professionnelle**. Différents contrats sont envisageables, mais un temps de présence en entreprise de trois mois constitue le minimum pour valider la formation.

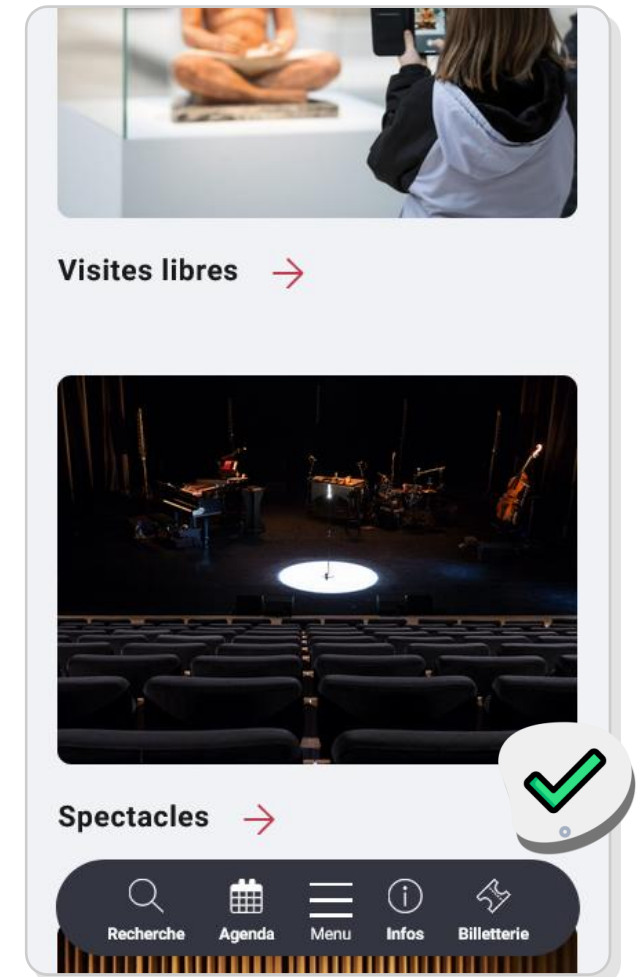

Best practice

Easier navigation with visible headings

Avoid using icons alone as navigation links.

Best practice

Easier navigation with self-explanatory headings even out of context

Avoid overly generic links such as 'See more', 'Read more', etc.

Je consulte les
numéros assistance
d'urgence

→ Par ici

Je veux déclarer
ou suivre mon
sinistre habitation

→ Par ici

Je consulte les
numéros assistance
d'urgence

→ Numéros d'urgence

Je veux déclarer
ou suivre mon
sinistre habitation

→ Suivi de sinistre

Examples

Can you spot any accessibility problems regarding links on the following websites?

- <https://www.lg.com/us/>
- <https://www.disneylandparis.com/en-gb>
- <https://www.mba-esg.com/alternance>

Layout & formatting

Best practice

Do not justify texts 1/4

Justified text can create spaces of varying widths that create 'rivers of white' in the text. These visual effects can cause difficulties for dyslexic readers.

Best practice

Do not justify texts 2/4

Justified text can
create spaces of
varying widths that
create 'rivers of
white' in the text.
These visual effects
can cause difficulties
for dyslexic readers.

Best practice

Do not justify texts 3/4

Justified text can create spaces of varying widths that create 'rivers of white' in the text. These visual effects can cause difficulties for dyslexic readers. **It is possible to use hyphenation, but word breaks can also cause difficulties for speech synthesizers.**

Best practice

Do not justify texts 4/4

On the other hand, a left-aligned text provides visual end of line markers, making it easier for readers to follow the transition from one line to the next.

Best practice

Accentuate capital letters

MÊME EN MAJUSCULES, LES
LETTRES DOIVENT ÊTRE
ACCENTUÉES

OTHERWISE, WORDS MAY BE
MISPRONOUNCED BY VOICE
SYNTHESIZERS

Pay attention to the first letter of a sentence.

There are keyboard shortcuts to write accented capitals:

Alt + 144 = É - Alt + 183 = À - Alt + 128 = Ç

Functional Accessibility

Navigation

Provide at least two options for reaching the same content

At least two of the following navigation systems must be present:

- A **main menu**
- A **sitemap** so that visitors have a clear understanding of the structure and can at least access all the sections and functionalities of the site.
- A **global search engine** which must be able to search through all site content (pages, texts, documents, videos, etc.)

Exceptions :

- Sites consisting of a **single page**
- Sites with a **reduced number of pages** and where all pages are **accessible from the home page**
- Pages that are **part of a process** (purchase funnel, for example)

Navigation systems always at the same place

Among the selected navigation systems:

- The **menu** and **main navigation bars** are always in the same place.
- **Sitemap** and **search engine** can always be reached in the same way.

Exceptions :

- Sites consisting of a **single page**
- **Home** pages

Examples

Do the following sites have at least two navigation systems?

Is their appearance consistent across all pages?

- <https://www.bestbuy.com/>
- <https://www.chevalblanc.com/en/>
- <https://www.martell.com/en/>

Provide a skip link to the main content

Each page of the site must provide a **skip link** to quickly access to the **main content** area.

Don't forget to include them in your mock-ups. It's the best way to make sure they are not forgotten!

Guarantee keyboard navigation

All interactions that can be **performed using the mouse** must also be **possible using the keyboard** (and vice versa).

- Drag&drop
- Information appearing on hover
- Etc.

Guarantee keyboard navigation

I want to play a game

<https://focus.hteumeuleu.com/>

Keep the keyboard focus visible

The keyboard focus indicator must not be hidden.

We strongly recommend that you do not remove or modify the default focus setting of browsers, as it is designed to be visible in many contexts.

If you do wish to do so, please ensure that :

- The outline is at least **2px wide**
- The outline is a **solid** line
- The outline is formed by two strokes of **opposite contrast**
- The outline **always** has a minimum contrast ratio of **3:1**

Provide an accessibility statement

In the case of a site required to comply with the RGAA, an accessibility statement must be provided.

This accessibility statement and its link could, for example, be titled '**Accessibility**' and must be **available from the same place on all the pages** of the site (generally the footer).

Compliance status must also be displayed on the **home page**:

- Non-compliant (< 50%)
- Partially compliant (between 50% and 100%)
- Fully compliant (100%)

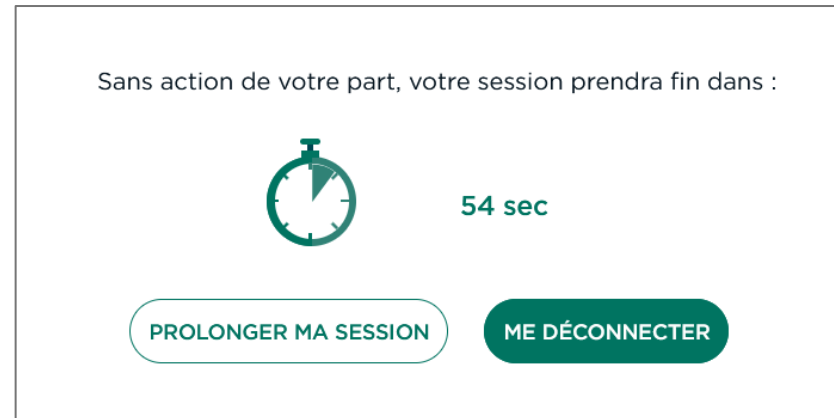

[Example of an accessibility declaration on the RGAA website](#)

Provide control over time limits

Remove (or at least extend) time limits must be possible:

- Sessions (online purchases, consulting banking data, administrative procedures, etc.)
- Timer (limited time to perform an action)

Avoid automatic reloads

If not, offer a mechanism to space them out.

Orientation and screen width

Do not enforce device orientation

All content must remain available and usable whatever the orientation of the device.

Design complete mobile mock-ups adapted for a 320px wide display

- The mobile version must provide the same informations and functionalities as the desktop version (content can be reorganised if necessary).
- Content must be viewable on a 320px wide screen without relying on a horizontal scrollbar.

Don't hide content in the mobile version because thinking it's not useful.

Examples

Do the following sites comply with best practice in terms of orientation and screen size?

- <https://www.japan-expo-paris.com/en/>
- <https://www.cnrs.fr/en/press/biologist-edith-heard-awarded-2024-cnrs-gold-medal>

Movement and gestures

Provide a way to pause animated content

Users must be able to stop and restart (or hide and display) all moving content.

A few examples:

- A **slider** with autoplay on
- A **perpetual animation** (example: a bouncy chat icon that jumps around so that people notice it)
- A **gif** or a **video** with autoplay on
- A **countdown timer** (with ticking seconds)
- A **banner** with **looping text**

What solutions?

Provide a « **Pause/Play** » button

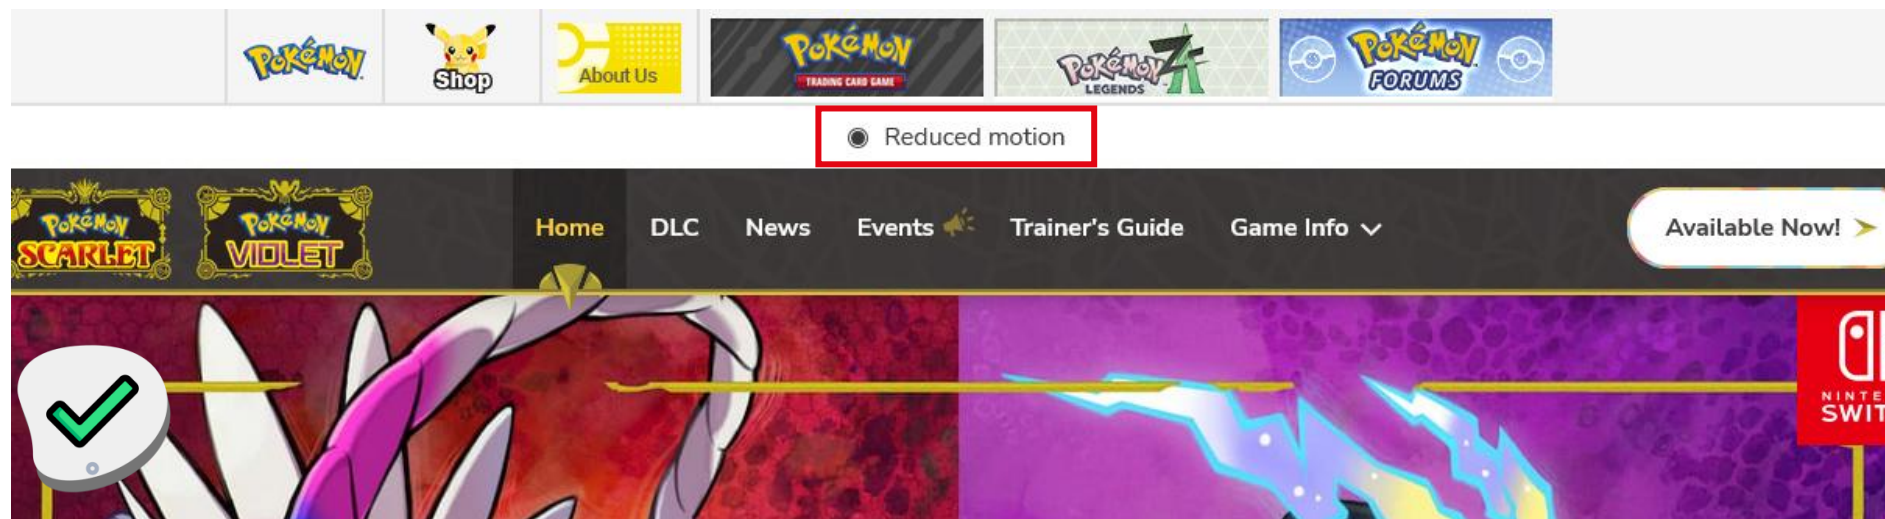

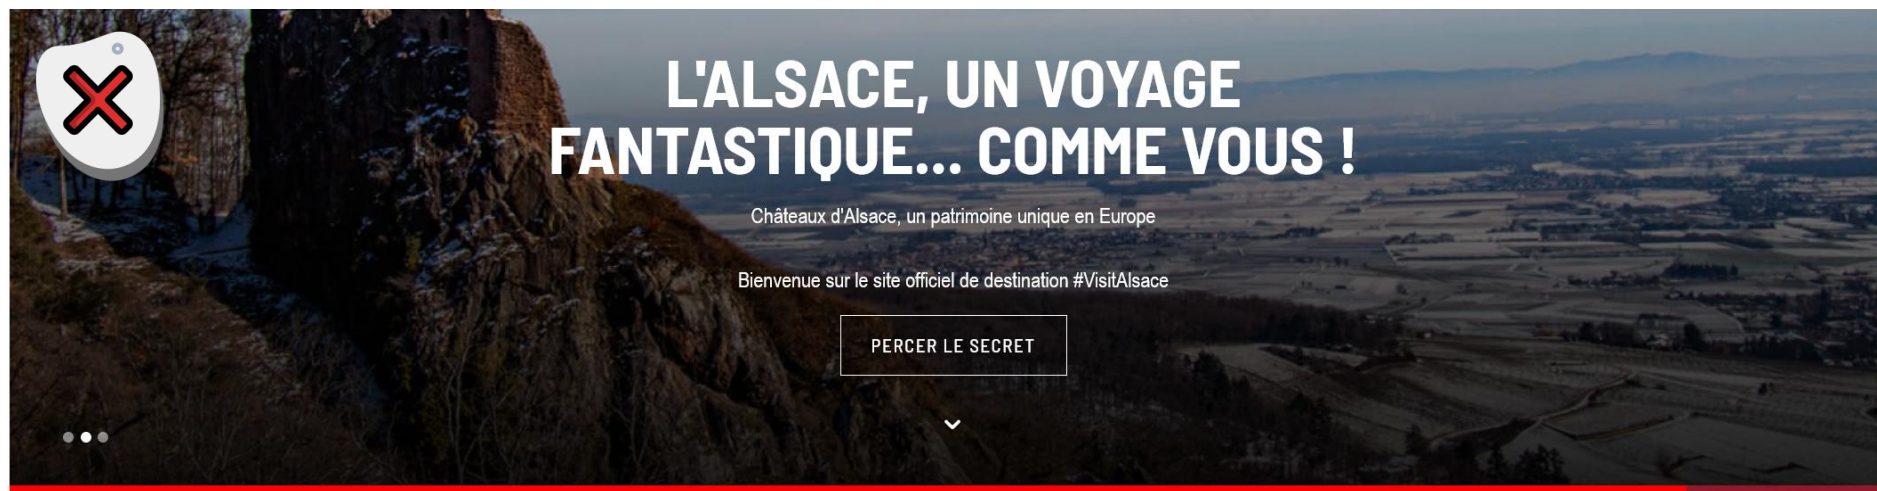

Use **less than 5 seconds** animations

Provide a mechanism to turn off all animations

Examples

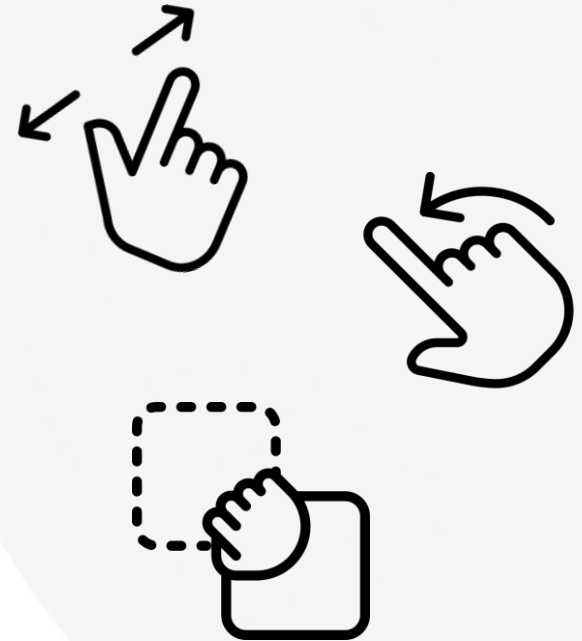

Offer an alternative for each complex procedure

What is a complex gesture?

A gesture is 'complex' if:

- It implies **multiple contact points** (two fingers on the screen to zoom in for)
- It requires you to **follow a precise trajectory** on the screen (a swipe to navigate a carousel).

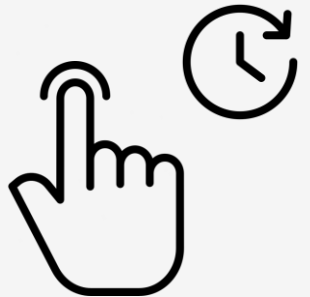

Offer an alternative for each complex procedure

And a simple gesture?

A gesture is said to be '**simple**' if it involves a **single point of contact** with the screen.

Some examples:

- Click
- Double-click
- Long press

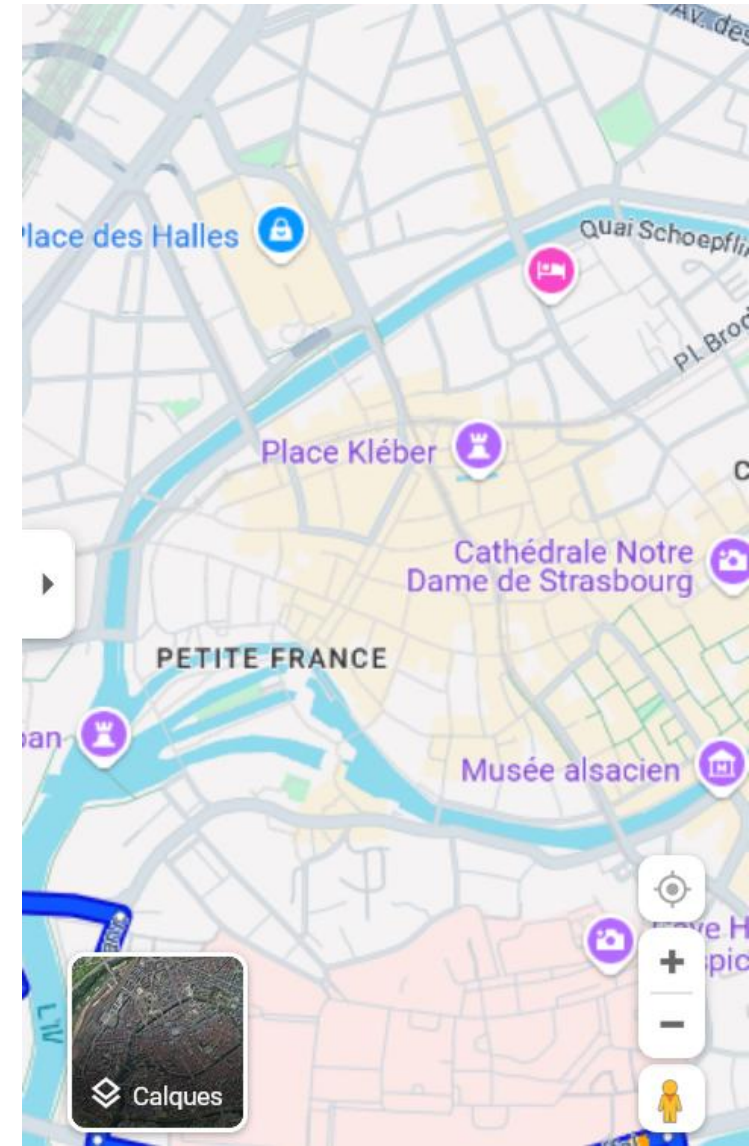

Offer an alternative via a simple gesture

If an action can be performed with a complex gesture, make sure it is also possible with a simple one (or a combination of simple gestures).

Example:

If you can zoom in on a map with two spreading fingers (complex gesture), then it must also be possible using “+” and “-” buttons (simple gesture).

Provide an alternative for each function based on the movement of the device and/or the person

When a functionality is triggered by a movement of the phone or the person, an alternative must be provided.

Exception:

If movement is necessary for the functionality, then the presence of an alternative is not required (e.g. pedometer).

Avoid sudden changes in brightness and flash effects

The **frequency** of visual effects must be **less than 3 per second** or the surface area occupied by these effects must be less than 21824px.

Exposition Champollion. La voie des hiéroglyphes
Musée du Louvre-Lens

Forms

Provide an explicit label for each form field

- Each field must have its own label.
- This should be **self-explanatory** (beware of fields being repeated on a page).
- Ideally, the label should always be **visible**.
- The placeholder cannot be used as a label (because it **disappears** when you type).

Name *

Firstname *

E-mail (ex : email@domaine.com) *

Message *

Position each label close to its field

Each field label must be placed close to its associated field.

- Either above the field
- Or next to it:
 - To the right of the field for checkboxes or radio buttons
 - To the left of the field for other types of field

Genre

☐ Femme ☐ Homme ☐ Autre

Prénom

Prénom*

Position each label close to its field

Do not leave too much space between the label and its associated field.

Civilité	
Nom	
Prénom	
Date de naissance	

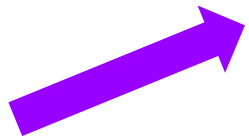

au format : JJ/MM/AAAA

Clearly indicate mandatory fields

- A distinctive sign must be included in the label of each required field: use of the “*” symbol, addition of a “(required)” mention, etc.
- If a symbol is used to convey this information, an explanatory legend must be included at the **beginning of the form**.

For example: “Mandatory fields are marked with an asterisk: *”

Fields marked with an asterisk (*) are **mandatory**.

Name *

Firstname *

Exceptions

- If all the fields are required, it is sufficient to state 'All fields are required' at the beginning of the form.
- If the form consists of a single field, it is not necessary to specify that this field is mandatory.

Stay in touch

Sign up to receive newsletters
from Cheval Blanc

FILL IN YOUR EMAIL

SUBSCRIBE

Provide input hints

- Indicate the expected format for fields with a format constraint:
 - Date format ('format: DD/MM/YYYY')
 - Maximum file size ('Maximum: 1MB')
 - Email address (format : vous@domaine.com)
- Do not include this information (**only**) in the placeholder.

E-mail (prenom.nom@domaine.lu) *

Date de naissance (jj/mm/aaaa) *

Provide clear error messages and suggestions for correction

For each error message:

- The associated field must be **identifiable by name**.
- The cause of the error must be **understandable**.
- **Suggestions for correction** must be provided if an error is due to an incorrect input format ('The @ sign is missing from the email field').
- It must be **close to the field** (in the label, under the field) or before the form.

Input format $\neq$ Input example

For example: prenom.nom@domain.fr – jean.dupond@gmail.com

Provide an explicit label for each button

- Button labels should make it possible to identify the action associated with the button, even out of context.
- Avoid generic labels such as 'Ok', 'Confirm', etc.
- Use action verbs instead: 'Register', 'Confirm payment', 'Start search', etc.

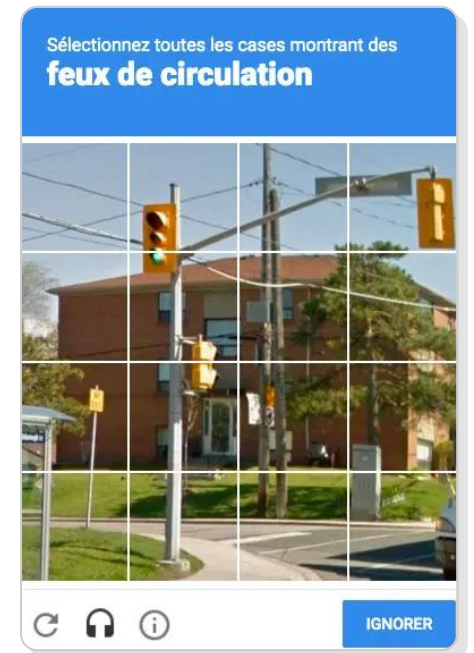

Provide an alternative for each visual-only CAPTCHA

CAPTCHAs are one of the main obstacles for people who are blind, partially sighted or have a motor or intellectual disability.

An alternative must be put in place:

- Either using **sound**
- Or **text**, in the form of a simple or mathematical question

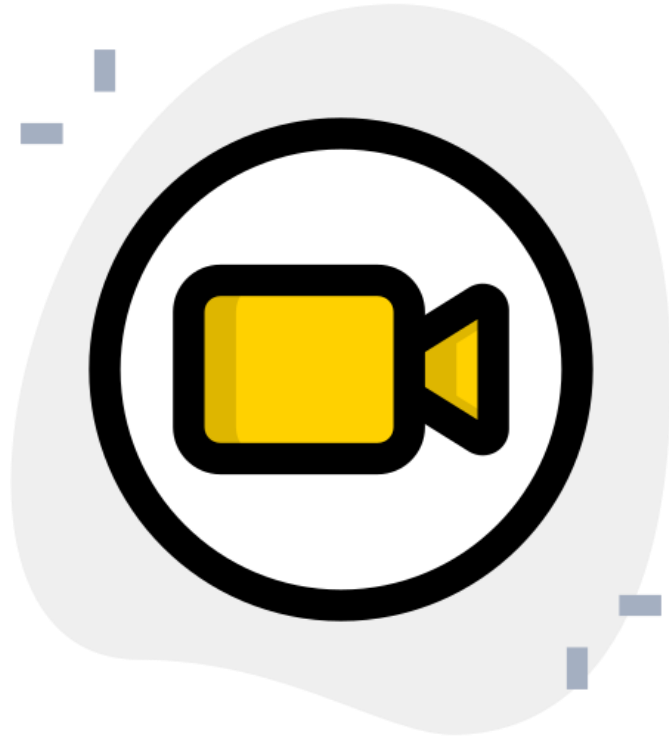

Examples

Are the following forms compliant with accessibility rules?

- <https://www.sodexo.com/contact-us/contact-form>
- <https://www.cupshe.com/account>
- <https://peugeot.my-customerportal.com/peugeot/s/case-webform>

Multimedia and rich content

Introduce each multimedia content

Each audio or video content must be **introduced by a visible title and/or a short introduction text**.

Provide subtitles for all video content

- When a video has an **audio track**, subtitles must be provided.
- Ideally, you should be able to activate/deactivate subtitles.
- Subtitles must be sufficiently contrasted!

Exception:

This rule does not apply to decorative content.

Provide an audiodescription for all video content

- When a video contains visual information that is **not present in the audio track**, an audiodescription must be provided.
- Audiodescription must include all the **information visually provided** in the video in audio form (voice-over).
- If the images in the video are illustrative or included in the audio track, an audio description is not necessary.

Exception:

This rule does not apply to decorative content.

Provide a text transcription for each multimedia content

A text transcript is a written conversion of an audio or video content.

It must contain **all the visual and audio information** in an accessible and **structured** form (HTML text, etc.).

It can be available:

- Either directly on the same page close to the media (on a leaflet panel, for example)
- Or on another page, via a link close to the media.

Exception:

This rule does not apply to decorative content.

Provide control over multimedia content and animations

- Provide at least a play / pause functionality
- If sound is present: activation / deactivation of the sound
- Videos and audio files played automatically must be **muted by default**.

Exceptions:

- If the animation lasts less than 5 seconds.
- If the sound lasts less than 3 seconds.

Provide a detailed description for each complex content

For each complex content, provide a **detailed description**.

Examples of complex content:

- An infographic.
- A graph (diagram, curve, etc.).
- A geographical map.
- Etc.

Provide a detailed description for each complex content

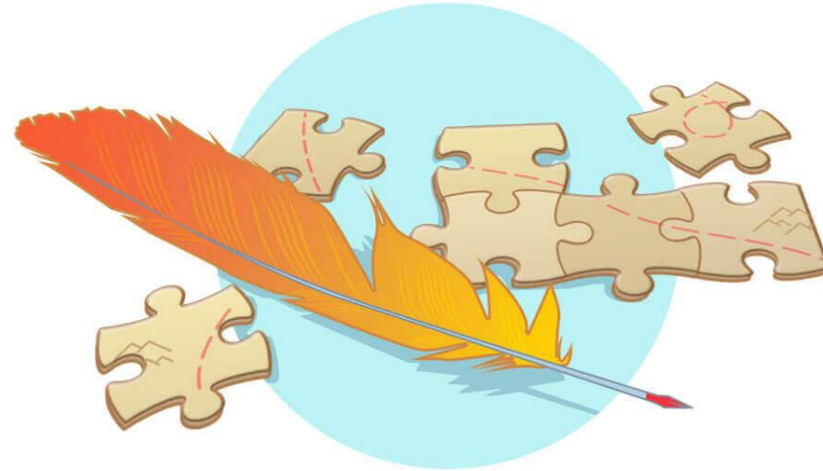

The detailed description must include all the information provided in the complex content in an accessible and structured form (HTML text, etc.).

It can be available:

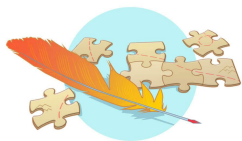

- Either directly on the same page close to the media (on a leaflet panel, for example)
- Or on another page, via a link close to the media.

Thank you !

Memo

Checklist ^{1/2}

Colours

- ☐ Be careful with colour contrasts
- ☐ Don't use colours as the only way to convey information

Links

- ☐ Write self-explanatory link labels
- ☐ Visually differentiate links in text

Mobile

- ☐ Do not delete content on mobile devices
- ☐ Do not force the orientation of the device

Navigation

- ☐ Provide at least 2 navigation systems
- ☐ Provide a skiplink to the main content
- ☐ Ensure keyboard navigation
- ☐ Keep the keyboard focus visible
- ☐ Provide an accessibility assessment
- ☐ Provide control over each time limit
- ☐ Avoid automatic refresh

Checklist 2/2

Movement and gestures

- ☐ Provide a control over all animated content
- ☐ Provide an alternative to complex gestures
- ☐ Avoid sudden changes in brightness and flash effects

Multimedia

- ☐ Provide a title for each media item
- ☐ Provide transcriptions and subtitles for audio and video content
- ☐ Provide a detailed description of each complex informative image
- ☐ Provide control over the playback and sound of audio and video content

Forms

- ☐ Provide an explicit label for each form field
- ☐ Position each label close to its field
- ☐ Clearly indicate mandatory fields
- ☐ Provide input hints
- ☐ Provide explicit error messages and suggestions for correction
- ☐ Provide an alternative for each visual-only CAPTCHA
